PROGRESS IN ORGANIC COATINGS

Subject Index of Volume 27

Accelerated exposure tests
analysis of test methods for UV durability predictions of polymer coatings, 95
Acrylic
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide, 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181
Adhesion
the effects of thermoplastic poly(olefin) (TPO) morphology on subsequent paintability and thermal shock performance, 241
Adhesives
rheology of acrylic dispersions for pressure sensitive adhesives, 33
Alkyd
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide, 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181
Appearance
application of profilometry and fractal analysis to the characterization of coatings surface roughness, 219

Blend
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide, 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181

Coating degradation
analysis of test methods for UV durability predictions of polymer coatings, 95
Coatings
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181
rheology of acrylic dispersions for pressure sensitive adhesives, 33
Cohesive strength
the effects of thermoplastic poly(olefin) (TPO) morphology on subsequent paintability and thermal shock performance, 241
Conversion
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide, 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181
Crosslinking
advances in environmentally benign coatings and adhesives, 153
mica pigments in solvent free coatings systems, 145
novel polyurethanes with interpenetrating networks for the coating industry, 133
polysiloxaneurethanes: new polymers for potential coating applications, 123
predicting electrocoat efficiency: a simple data-based model for predicting electrocoat usage, 25
properties of crosslinked polyurethane dispersions, 1
radiation chemistry aspects of polymerization and crosslinking. A review and future environmental trends in 'non-acrylate' chemistry, 107
stainless steel as new substrate for coil coating, 17

Dispersions
predicting electrocoat efficiency: a simple data-based model for predicting electrocoat usage, 25
properties of crosslinked polyurethane dispersions, 1
rheology of acrylic dispersions for pressure sensitive adhesives, 33
Durability
analysis of test methods for UV durability predictions of polymer coatings, 95

Electrochemical impedance spectroscopy
electrochemical impedance spectroscopy; a tool for organic coatings optimizations, 201
Emulsion stabilizers
group transfer polymerization and its use in water based pigment dispersants and emulsion stabilizers, 255
studies on low temperature curable powder coatings, 269
the scanning Kelvin probe; a new technique for the in situ analysis of the delamination of organic coatings, 261

Elsevier Science S.A.

End-functional polymer
new macromolecular silane coupling agents synthesized by living anionic polymerization; grafting of these polymers onto inorganic particles and metals, 277
End-triethoxysilylated polymer
new macromolecular silane coupling agents synthesized by living anionic polymerization; grafting of these polymers onto inorganic particles and metals, 277
Epoxy coatings
electrochemical impedance spectroscopy; a tool for organic coatings optimizations, 201

Film properties
adhesion of latex films; influence of surfactants, 87
analytical aspects and film properties of two-pack acetoacetate functional latexes, 73
the use of polypropylene in pipeline coatings, 79
Fractal analysis
application of profilometry and fractal analysis to the characterization of coatings surface roughness, 219

Graft reaction
new macromolecular silane coupling agents synthesized by living anionic polymerization; grafting of these polymers onto inorganic particles and metals, 277
Group transfer polymerization
group transfer polymerization and its use in water based pigment dispersants and emulsion stabilizers, 255
studies on low temperature curable powder coatings, 269
the scanning Kelvin probe; a new technique for the in situ analysis of the delamination of organic coatings, 261

Hybrid
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide, 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181

Living anionic polymerization
new macromolecular silane coupling agents synthesized by living anionic polymerization; grafting of these polymers onto inorganic particles and metals, 277

Non-acrylate chemistry
advances in environmentally benign coatings and adhesives, 153
mica pigments in solvent free coatings systems, 145
novel polyurethanes with interpenetrating networks for the coating industry, 133
polysiloxaneurethanes: new polymers for potential coating applications, 123
radiation chemistry aspects of polymerization and crosslinking. A review and future environmental trends in 'non-acrylate' chemistry, 107
stainless steel as new substrate for coil coating, 17

Paint adhesion
the effects of thermoplastic poly(olefin) (TPO) morphology on subsequent paintability and thermal shock performance, 241
Photoinitiators
recent developments in photoinitiators, 227
Photopolymerization
advances in environmentally benign coatings and adhesives, 153
mica pigments in solvent free coatings systems, 145
novel polyurethanes with interpenetrating networks for the coating industry, 133
polysiloxaneurethanes: new polymers for potential coating applications, 123
radiation chemistry aspects of polymerization and crosslinking. A review and future environmental trends in 'non-acrylate' chemistry, 107
stainless steel as new substrate for coil coating, 17
Polymer coating
analysis of test methods for UV durability predictions of polymer coatings, 95
Polymeric dispersant
new macromolecular silane coupling agents synthesized by living anionic polymerization; grafting of these polymers onto inorganic particles and metals, 277
Polymerization mechanism
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide, 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181
Polyurethane
predicting electrocoat efficiency: a simple data-based model for predicting electrocoat usage, 25
properties of crosslinked polyurethane dispersions, 1
Profilometry
application of profilometry and fractal analysis to the characterization of coatings surface roughness, 219
PSA
rheology of acrylic dispersions for pressure sensitive adhesives, 33

Radiation
advances in environmentally benign coatings and adhesives, 153
mica pigments in solvent free coatings systems, 145
novel polyurethanes with interpenetrating networks for the coating industry, 133
polysiloxaneurethanes: new polymers for potential coating applications, 123
radiation chemistry aspects of polymerization and crosslinking. A review and future environmental trends in 'non-acrylate' chemistry, 107
stainless steel as new substrate for coil coating, 17
Renewable resources
factors affecting the miscibility of simultaneous IPNs and pseudo-IPNs, 67
life cycle assessment for painting processes: putting the VOC issue in perspective, 55
renewable resources in coatings technology: a review, 45
Rheology
rheology of acrylic dispersions for pressure sensitive adhesives, 33

Surface roughness
application of profilometry and fractal analysis to the characterization of coatings surface roughness, 219

Technology
factors affecting the miscibility of simultaneous IPNs and pseudo-IPNs, 67
life cycle assessment for painting processes: putting the VOC issue in perspective, 55
renewable resources in coatings technology: a review, 45

Thermal shock
the effects of thermoplastic poly(olefin) (TPO) morphology on subsequent paintability and thermal shock performance, 241
Thermoplastic olefin
the effects of thermoplastic poly(olefin) (TPO) morphology on subsequent paintability and thermal shock performance, 241
Two-pack acetoacetate functional latexes
adhesion of latex films; influence of surfactants, 87
analytical aspects and film properties of two-pack acetoacetate functional latexes, 73
the use of polypropylene in pipeline coatings, 79

Viscoelasticity
rheology of acrylic dispersions for pressure sensitive adhesives, 33
Viscosity
rheology of acrylic dispersions for pressure sensitive adhesives, 33

Water based pigment dispersants
group transfer polymerization and its use in water based pigment dispersants and emulsion stabilizers, 255
studies on low temperature curable powder coatings, 269
the scanning Kelvin probe; a new technique for the in situ analysis of the delamination of organic coatings, 261
Waterborne
alkyd–acrylic hybrid systems for use as binders in waterborne paints, 163
amine functional polymers based on *N*-ethenylformamide, 209
characterization of surface structures by mechanical and optical Fourier spectra, 195
development of a staining preventive coating for architecture, 173
in situ measurement of water at the organic coating/substrate interface, 181
